

Luminos 1

Cost effective flying insect control

Luminos 1 has been developed for food retail customers such as bakeries, delicatessens and cafés, providing an effective and low cost fly control solution.

Luminos 1 is a highly effective glue board unit that has been designed for relatively low risk environments within food retail operations. It can be wall mounted or installed on a flat surface using an additional bracket.

Within the unit's modern exterior lies a powerful 36W UV-A lamp. This attracts all types of flying insects, which are then captured on one of the two glue boards provided with the unit. By trapping the insects, Luminos 1 avoids the problem of insect fragments, that can occur when using traditional electric grid fly killer units.

Benefits to your business

- Highly effective – eliminates the nuisance caused by flying insects.
- Discreet, unobtrusive design – can be used in public areas.
- Safe and hygienic – no pesticides or flying insect fragments.
- Provides peace of mind – fulfils legal and health & safety requirements.
- Adaptable – can be wall-mounted or sited on a flat surface, using an additional bracket.

Suitable for a range of customers, including:

- Cafés
- Bakeries
- Delicatessens
- Take-aways

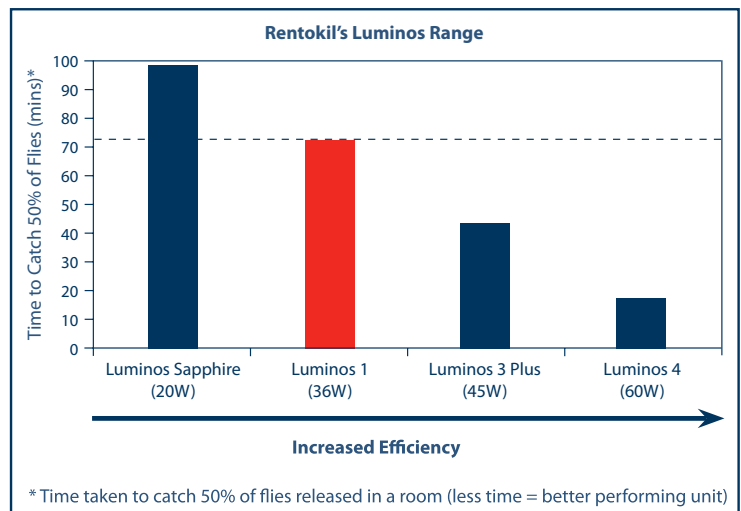

Luminos 1

Cost effective flying insect control

Effectiveness at a reasonable price

A series of tests carried out on Rentokil's Luminos range and competitor units showed that the Luminos 1 outperforms a range of competitor products.

The graph opposite reflects the calculated "Half Life Time" for Rentokil's Luminos range. This test measures how quickly a unit catches 50% of flies in an area, and uses this as a proxy for overall effectiveness. The data indicates that Luminos 1 is effective in low risk areas, whilst Luminos 3 or Luminos 4 would be recommended in higher risk areas.

Technical specification

Luminos 1 conforms to all relevant European electrical and UV safety standards.

To ensure optimum performance, the glue boards should be replaced at regular intervals, dependent on infestation levels. The lamp should be replaced annually at the beginning of the fly season.

The unit is supplied ready to use, with the 36W lamp and 2 glue boards.

Luminos 1	
Dimensions (H,W,D)	460mm x 110mm x 240mm
Weight	3.5kg (Unboxed)
Lamp	1 x 36W PL Powerline UV-A
Electrical Supply	200-240V / 50-60Hz
Mounting	Wall mounted or tabletop using the fixing bracket
Material	Casing – coated ABS Louvre – UV transmitting ABS plastic
Guarantee	2 years

With more than 600 Technicians across the country, we are always local to you.
