

Did you know [Rentokil](#) offer damp & woodworm treatments?

10.06.2009 Today sees the re-launch of the [Rentokil Property Care](#) website. Fully updated and expanded information and advice about surveys and treatments for damp, woodworm, rot and cavity wall tie corrosion are now accessible online.

Customers will be able to get general information and advice online about [damp treatment](#), [treating woodworm](#), [wet rot](#) and [dry rot treatment](#). Customers can also learn about Rentokil's damp proofing and basement waterproofing services as well as [cavity wall tie corrosion treatments](#). Important information, such as safety data sheets on products used during treatments, is also provided. As an addition to the new site, customers are now also able to contact the business and book surveys online via a contact form.

Recognising the need to showcase the full service offering and capabilities of this specialised division of Rentokil, the decision was taken to update Property Care's website and introduce customers to a greater source of information, advice and treatment guides.

This decision has helped to raise the profile of this long standing business, which has been in operation since the beginnings of Rentokil back in 1927. Customers will be able to benefit from the wealth of expertise and experience that has been built up in this field in almost a century of operation.

Property Care is a specialised division of Rentokil working in the field of remedial timber treatment and damp proofing, operating across Britain and servicing all size and age of properties.

Notes to Editors

About Rentokil

Around the world, Rentokil is the leading provider of pest control and specialist hygiene services. The company protects homes and commercial premises from the damage, health risks and nuisance that pests cause. While flies, insects and rodents might be the first that come to mind, Rentokil technicians also provide specialist hygiene to treat microbiological risks and treat buildings for woodworm and dry rot. Whatever the pest, Rentokil can deal with it.
