

Rentokil

The Experts in Pest Control

Rentokil Clothes Moth Riddance

A cost effective & safe approach to clothes moth control

Once inside your home or business, clothes moths can severely damage natural fibres in carpets, clothes, fabrics, fur and even leather.

Moth larva cause the damage by eating the protein (keratin) found in natural materials like wool, cotton and silk. This potentially puts your delicate items at particular risk of damage.

Signs of clothes moth include:

Damage to clothes, fabrics or carpets: clothes moth cause irregular shaped holes in fabrics.

Presence of adult moths, often crawling rather than flying.

Pupae (silk cocoons) from which larva emerge as adult moths.

Benefits to you and your business

- Effective: We use professionally available pesticides and solutions to quickly control clothes moth activity.
- Safe: Our unique, pesticide free, Heat Pod treatments kill all life stages of clothes moths.
- Peace of Mind: We have a team of reliable, qualified and experienced professionals, ensuring your clothes moth problem is controlled safely and effectively.

Our solution

Rentokil use an Integrated Pest Management (IPM) approach to clothes moth control, using effective products and services to quickly and effectively control moth activity.

Enhanced Monitoring- to effectively establish the extent of the infestation, in order to better understand the activity and to provide the best control solutions.

Population Control Assist- This technique confuses moths helping to break their life-cycle, reducing their breeding capacity- resulting in reduced populations of moths.

Heat Pod treatments: kills all life stages of the moth in infested items.

Supplementary crack and crevice insecticide treatments- taking the insecticide directly to the insect.

Further monitoring, gives an early warning of any future infestations.
