

Cockroach Riddance

Effective cockroach control from 'The Experts!'

Finding cockroaches in your home or business can be very distressing. As known carriers of diseases such as **Salmonella, Dysentery & Gastro-enteritis**, exposure to this pest can pose a significant health risk.

Cockroaches are very tough insects and their ability to breed rapidly makes professional treatment essential to control any infestation. Only expert products and solutions are powerful enough to eliminate all stages of their lifecycle.

If you have noticed an unpleasant, lingering odour under sinks, behind appliances or in store cupboards, it's time to check for signs of cockroaches.

Benefits of Rentokil Cockroach Riddance

- **Effective:** We use professionally available pesticides to quickly control cockroach activity.
- **Reduced risk of disease:** Reduce the risk of disease transmission associated with cockroaches, with our Pest Disinfection service.
- **Peace of Mind:** We have a team of reliable, qualified and experienced professionals, ensuring your cockroach problem is controlled safely and effectively.

Control Solutions

Rentokil use an Intergrated Pest Management (IPM) approach to cockroach control, using effective products and services to quickly and effectively control cockroach activity.

Our services include:

Initial monitoring & night inspections- to establish the extent of the infestation, in order to better understand the activity and to provide the best control solutions.

Cockroach baiting- we use an effective insecticide bait treatment to quickly and effectively control infestations.

Supplementary crack and crevice insecticide treatments- taking the insecticide directly to the insect.

Pest Disinfection treatments- reduces the risk of disease transmission associated with a cockroach infestation.

Further monitoring- gives an early warning of any future infestations.
