

Rentokil

The Experts in Pest Control

A man in a light blue shirt and a woman in a red and grey Rentokil polo shirt are standing in a supermarket aisle. They are both looking at a smartphone held by the woman. The background shows shelves stocked with various fruits and vegetables, including yellow peppers, orange tomatoes, and green eggplants. Price tags are visible on the shelves.

Local Pest Control
from the experts

Global Expertise, Local Presence

Setting the Pest Control standard
for 100 years in homes and
businesses

As the UK's largest commercial pest control company, Rentokil can help safeguard your brand reputation and operations on a local and national scale. Our strong nationwide approach ensures we have a local presence to support our commercial customers with their pest control needs.

With the largest team of over 1,000 expert frontline specialists, we use innovative technology and service models to minimise the risk of pests impacting your business. But if they do, we will react quickly and efficiently to get rid of them.

Our Experts

From the most common rodent to the rarest insect, our technicians are trained to recognise the signs and stop pest problems developing. With the largest team of pest control technicians in the UK, there will always be someone close by who can respond rapidly to any pest issues that you face.

We offer comprehensive solutions for:

- Mice
- Rats
- Flies
- Cockroaches
- Bed Bugs
- Birds
- Wasps
- Ants
- Textile Pests
- Spiders
- Stored Product Pests
- Other Vertebrate Pests

The Technology to Protect your Business

We use innovative technology to ensure that your business is kept free from pest problems.

Lumnia

Rentokil's pioneering Lumnia fly control units use LED technology and streamline modern design to effectively eliminate flies and protect your business reputation. No matter the size of your business there is a Lumnia unit that will suit your requirements.

RADAR X

RADAR X is a dual capture mouse trap, which is designed to provide rapid mouse control to your premises, giving you complete peace of mind

Dual AutoGate

Dual AutoGate is an intelligent rodent bait station which controls access to rodenticide for external rat baiting. It is a unique and innovative solution to permanent external rat baiting that ensures legal compliance.

EcoCatch Fly

Rentokil EcoCatch Fly is a sustainable external control solution, which provides a non-toxic and effective way of controlling public health flies in outdoor locations.

PestConnect

Intelligent Pest Control that Doesn't Cost the Earth

Rentokil can protect your business with minimum onsite visits and disruption using our 24/7 rodent monitoring and PestConnect system. PestConnect provides maximum protection with minimal disruption to your business environment, protecting your staff and customers from rodent pests.

Benefits of installing PestConnect

Connected 24/7 Monitoring and Control

Our intelligent connect offering effectively monitors and control rodents 24/7, saving you time and money dealing with costly infestations.

Expert Technicians

With over 800 expert technicians, Rentokil can provide a rapid response nationwide, through the local and consistent availability of staff.

Unique and Effective Products

Tailored to your site and your needs, PestConnect provides a real-time, early warning system for the monitoring and control of rodents.

Sustainable Solutions

We use a range of sustainable solutions, to effectively control rodents without harming the environment, saving up to 60% in rodenticide use and protecting your reputation.

How PestConnect Works

- Rentokil's PestConnect system uses a range of connected devices to monitor for, and control, any rodents that find their way into your business.
- Once a device is triggered, PestConnect will send an alert to a Rentokil technician, who will then quickly respond to deal with the activity quickly and effectively.
- All the details of the site visit, including pest activity and recommendations raised, will be reported on myRentokil.

RADAR X

Unique 24/7 monitoring, bait-free and humane catch and despatch mouse control system.

Dual AutoGate Connect

Allows for legal permanent external baiting to control rodents, whilst reducing the risk of non target species poisonings.

myRentokil Reporting

Provides insights into pest history and recommendation status, which gives the information needed to help us better protect your business against the harmful effects of pests.

The Business Impact of Pests

Pest issues can cause enormous economic loss and reputational damage to businesses as well as negatively impacting staff morale.

The result of a pest infestation in your business can lead to serious implications, which can include:

- Damage to customer trust
- Lost sales and profits due to loss of customers
- Financial loss from claims of compensation
- Potential prosecution by public health and safety regulatory authorities
- Closure of the business by regulatory authorities or public health authorities

The major pests affecting businesses include rats, mice, flies, cockroaches and nuisance birds.

A brown rat population can swell from two rats to around 1,248 a year, if unchecked

Cockroaches are known to spread 33 kinds of bacteria, including E.Coli and Salmonella

Flies carry numerous pathogens, which can contaminate food on your premises

Signs of Pest Activity in your Business

Signs of Rodents

- Droppings, which have a distinctive size and shape for each species
- Smear marks, along runs caused by their oily fur
- Gnawing of building materials, wiring, food and packaging
- Tracks in dust or powder
- Noises such as squeaks, gnawing sounds, scurrying sounds
- Urine stains left by both rats and mice can be detected using UV light

Signs of Flies

- Small dark clusters of faeces in light areas (the size of a pinhead)
- Sightings of flies around your business, food or bins
- Maggots - these are flies in their larval stage and could indicate an imminent infestation

Signs of Bed Bugs

- Live sightings - although small it is possible to spot live bed bugs
- Small blood spots on linen
- Dark stains on the mattress and surrounding area from bed bug excreta

Signs of Birds

- Nesting materials in and around buildings
- Damaged stock from pecking and bird fouling
- Droppings concentrated in areas where birds roost
- Debris from nests and feathers, which may block guttering and drainage systems, potentially leading to damp damage

Signs of Cockroaches

- Unusual smell - an established infestation produces a lingering and unpleasant odour that taints items they contact
- Cockroach droppings - will produce brown/black cylindrical droppings, approximately 2mm long
- Smear marks - can produce brown and irregular shaped smear marks
- Shed skins - nymphs shed skins a total of 5-8 times as they mature into adults over 55-68 days

Rentokil

The Experts in Pest Control

Why Choose Us?

Rapid, Local and Expert Response

- We have the highest qualified and independently accredited teams in the UK with over 1,000 expert frontline specialists. Our qualified technicians are trained to RSPH Level 2 as a minimum with over 400 qualified to BPCA/RSPH Level 3 and above.

Innovative Solutions

- As the UK's leading connected pest control company our unique PestConnect system provides a real-time, early warning system to effectively control rodents without harming the environment, saving up to 60% in rodenticide use and protecting your reputation.

Sustainability

- We are a company committed to delivering a range of sustainable solutions, in order to reduce pesticide use and lower emissions, as well as being focused on reducing the waste we produce and recycling more, to help mitigate our environmental impact.
