

## PestConnect

Intelligent Pest Control That  
Doesn't Cost the Earth

# Complete Protection for the Food Industry

Rodent pests are a significant risk to the food manufacturing industry. They carry a wide range of diseases, can physically contaminate food, damage building infrastructure and can cause significant economic damage to your business.

Both rats and mice are a big threat to food handling facilities as they are adaptable, unpredictable and highly mobile, so having a robust pest control solution in place is vital to ensure you are protected against these damaging pests.

Food manufacturers need to have a robust rodent monitoring and control system in place in order to reduce the risk of a rodent infestation developing. In addition, this system needs to be fully compliant with food hygiene legislation as well as various audit standards.

PestConnect, Rentokil's innovative connected pest management system, provides food manufacturers with 24/7 remote monitoring and immediate control of rodent pests, using bait-free and highly targeted treatments.

## Helping you with Audit Compliance

Due to the broad requirements of food safety and quality audits, it is important businesses in the food industry have a pest control solution that supports audit compliance.

Rentokil's proactive connected devices are an **integral part of an integrated pest management programme**, an essential prerequisite which supports the **HACCP** on your site.

Our customer portal **myRentokil** provides easy-to-access, online reporting.

**PestConnect**, our digital pest control system provides remote **24/7** control and monitoring.

This technology can help with **remote audits** by providing all the data surrounding rodent activity, follow ups, trend analysis and root cause analysis required.

# Benefits of PestConnect for the Food Industry

PestConnect provides confidence and certainty to businesses. Key benefits include:

**Connected 24/7 Monitoring and Control**  
Our **intelligent** connect offering effectively monitors and control rodents **24/7**, saving you time and money dealing with costly infestations

**Expert Technicians**  
With over **800 expert technicians**, Rentokil can provide a rapid response nationwide, through the local and consistent availability of staff

**Unique and Effective Products**  
Tailored to your site and your needs, PestConnect provides a **real-time, early warning** system for the monitoring and control of rodents

**Sustainable Solutions**  
We use a range of **sustainable solutions**, to effectively control rodents without harming the environment, saving up to **60%** in rodenticide use and protecting your reputation

## Compliant With Evolving Legislation

CRRU (Campaign for Responsible Rodenticide Use) guidelines are resulting in tighter legislation on the use of rodenticides

- ✓ PestConnect offers **bait-free** internal monitoring and control
- ✓ **Dual AutoGate Connect** reduces rodenticide exposure externally as well as the risk to non-target species and the environment
- ✓ PestConnect enables us to be **CRRU compliant**, whilst providing your business with the best defence against pests

**“Over 9,000 PestConnect devices are already installed across 268 Audited Food Manufacturing sites worldwide”**

**PestConnect is already established within many BRC and AIB audited food sites**

**CHRIS HAYTER**  
TRANSPORT LTD

“ PestConnect makes this part of my role so much easier. I am now able to hand our pest control report to the auditor, with full confidence that it is accurate and up to date. ”  
*Marin Hamill, Site Manager*

“ PestConnect has introduced real time monitoring of our facility to support the prevention of any potential pest issues and we believe the system has taken us to the next level of protection. ”  
*Andy Turner, Director*

## How PestConnect Works

- ✓ PestConnect uses a range of connected devices to monitor for, and control, any rodents that find their way into your business.
- ✓ Once a device is triggered, the system will send an alert to a Rentokil technician, who will then respond to deal with the activity quickly and effectively.
- ✓ Whilst on site the technician will check the surrounding areas for further signs of pest activity, along with raising relevant recommendations.
- ✓ Where deemed necessary the technician will implement additional controls using all relevant control methods available where appropriate.
- ✓ All details of the site visit, including pest activity and recommendations raised, will be reported on myRentokil.

**PestConnect RADAR\***

Unique **24/7** monitoring, bait-free and effective catch and despatch mouse control system.

\*Use biocides safely. Always read the label and product information before use.

**Dual AutoGate Connect**

Allows for strategic external baiting to monitor and control target rodents **365** days of the year, whilst reducing the risk of non target species poisoning.

**Rat Riddance Connect**

Monitors for and controls rats **24/7** using non toxic yet highly effective traps.

**myRentokil Reporting**

Provides insights into pest history and recommendation status, which gives the information needed to help us better protect your business.

myRentokil is accessible on PC, phone and tablet

## PestConnect uses Robust and Secure End to End System Protocols

### Secure Dynamic Encryption

Ensures that PestConnect data is transmitted securely.

### Robust UHF and Mobile Network

Strong signals between devices and control panels ensures that data is not lost. In addition, PestConnect transmits data using mobile networks, so at no point do we connect to the customers' WiFi.

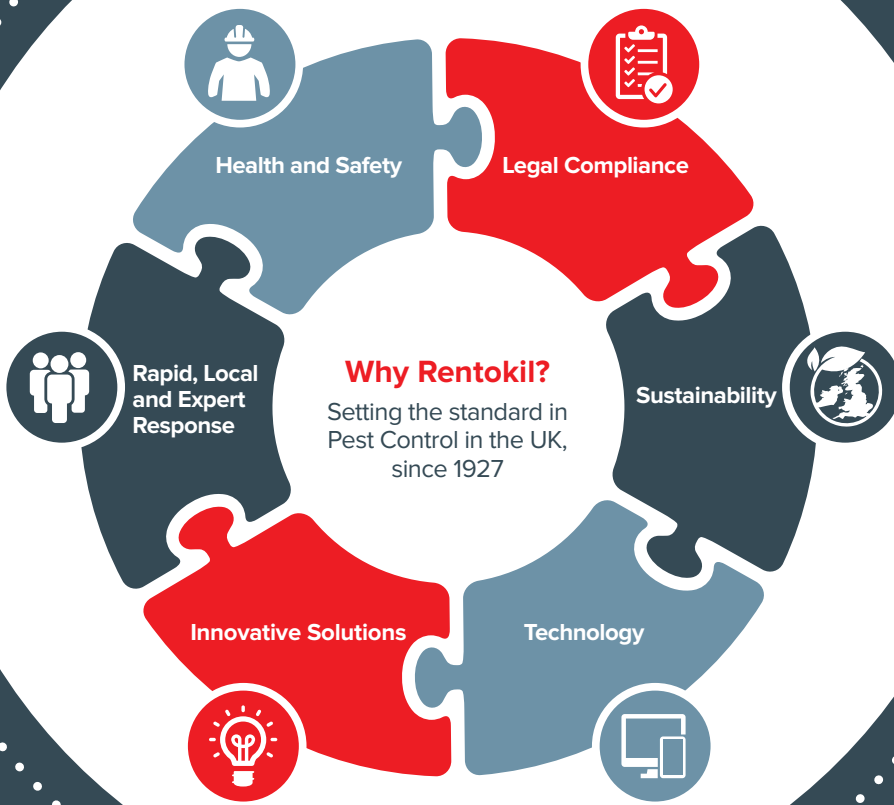

### Continual Back up on Secure Cloud Servers

Ensuring that data is secure and protected against unauthorised access or loss.

**Even in a worst case scenario event e.g. a complete plant power failure, devices are still continually monitoring and controlling pests 24/7.**

## A Sustainable Approach to Pest Control

All of our connected rodent control solutions are sustainable, and are compliant with UK legislation and regulations, giving you peace of mind that your business is protected against pests.

- ✓ PestConnect's sustainable products can help you achieve your **ISO 14001** environmental targets
- ✓ **RADAR and Rat Riddance Connect** both have zero bait, ensuring that no allergens are present internally
- ✓ **AutoGate** provides smart external rodent monitoring and control, whilst significantly reducing the risk of exposure of non-target wildlife to toxic rodenticides when compared to traditional baiting strategies.
- ✓ **Zero** paper reporting with myRentokil
