

Rentokil

"The rat race just got a new winner. A relentless performance."

Rentokil presents

ELIMINAIR

RODENT CONTROL. REVOLUTIONISED.

The fastest air-driven, multi-catch rodent control system available, ensuring effective, reliable and humane control of rats.

ELIMINAIR

The rules have changed.

This is not pest control as you know it...or air, for that matter. This is Eliminair — the next generation of rodent control, and the latest addition to our PestConnect range with 24/7 real-time, intelligent monitoring and protection.

Eliminair is driven by breakthrough high-pressure air technology, to deliver **fast-acting, reliable and humane rat control without rodenticides**. With a lightning-fast <50 millisecond trigger time and 100% dispatch rate, Eliminair exceeds standards for humane control* and sets a new global benchmark for welfare. It meets the strictest hygiene standards with secure carcass containment and is certified by HACCP International.

Designed to be the ultimate automated solution for modern pest management, Eliminair is always on. Powered by a 3.5-year battery life, and a 15-second automatic reset, it's always ready to protect your premises from the next rat. Equipped with four times the catch capacity of a traditional snap trap, it minimises costly downtime. And what's more? It's 57% more attractive to rodents versus the closest alternative.*** It really is rodent control, revolutionised.
