15	WHY RENTOKIL

Introducing digital pest control:

for enhanced rodent protection all day, every day.

It can be challenging to protect your business from fast-evolving pest threats 24/7, especially in areas that are difficult to monitor for pest activity or are automated or unmanned.

We have a solution for you. PestConnect, our digital pest control system, allows you to protect your business around the clock.

PestConnect: Effective. Sustainable. Trusted.

Getting started with PestConnect

PestConnect is a system of connected devices that detect, capture and eliminate rats and mice. It's proven to provide enhanced protection against costly infestations in a more sustainable way.

Our expert technicians conduct a full survey of your premises to determine all pest risks and create a bespoke integrated pest management solution for you. They install the PestConnect system and set up your account on our customer portal - myRentokil.

Along with comprehensive management of all pests on your premises, our technicians provide a cyclical five-step integrated pest management cycle with continuous optimisation.

How PestConnect works for your business

Let's look at the process.

1 Monitor

Our PestConnect devices monitor your premises 24/7, 365 days a year, so you don't have to wait for a service visit to ascertain what's been happening.

2 Alert

When a rodent enters the connected solution, it sends an alert to Rentokil with the time and location of the pest activity.

3 Respond

A local technician will then arrange a visit to service the devices and carry out any remedial action.

4 Report

All activity is recorded and available on our online customer portal, myRentokil. So, you can access real-time information, including risk assessments, recommendations and pest activity trends, 24/7.

5 Optimise

During every service visit, the technician will inspect your premises to identify any signs of potential infestations and provide recommendations for prevention – keeping you one step ahead of pests.

And that's it

It's as easy as 1,2,3...(4 and 5) to achieve enhanced protection for your premises with our digital pest control.

What are the benefits of PestConnect?

PestConnect can offer your business the following benefits over traditional pest control methods.

Enhanced protection against costly infestations with 24/7 monitoring for continuous peace of mind.

Quick, expert resolution as **PestConnect can resolve rodent activity twice as fast**, minimising your company's downtime.

A rodenticide reduction of up to 60%, so we can protect your premises while protecting the environment.

A data-driven service so we have a better understanding of your pest risks and can be more targeted in our approach.

What devices are included in the PestConnect range?

Our connected pest control devices mean you don't have to wait until your next service visit for peace of mind. They're on watch all day long and all year round, ready to instantly alert our technicians, giving you continuous peace of mind.

Our experts turn this data into rapid, targeted action that enables a quicker resolution for you. And the system can even help you reduce rodenticide use by up to 60%.*

It all starts with the connected devices on your site, and the PestConnect range includes the following.

**Based on a comparison of rodenticide bait use at customer sites transitioning from non-connected to connected pest control. All data on file.*

RADAR X Connect Double the trapping power, double the protection

Targets: mice
Designed for: indoor environments

Why RADAR X:

- Dual chambers for double the trapping power and protection
- Effective, bait-free treatment providing rapid mouse control
- Chambers discreetly contain eliminated mice to minimise contamination risk
- Robust, dust-tight device, protected against water jets from any angle
- HACCP certified for facilities that operate a HACCP-based food safety programme¹

¹ Certified by HACCP International

Dual Autogate Connect Smart technology for safer baiting

Targets: rats and mice
Designed for: outdoor locations

Why Dual Autogate:

- **Patented technology:** A unique and first-to-market solution designed to revolutionise outdoor baiting safety.
- **Safer to use in high-risk areas:** Intelligent sensors continuously monitor and count rodent activity, ensuring bait remains securely locked away until strictly necessary.
- **Research-driven precision:** Sensor triggers are calibrated using our rodent behavioural research, ensuring the gate only opens when specific activity thresholds are met.
- **Enables targeted baiting:** Minimises bait use, reducing environmental impact.

T-Rex

Hardware that hits hard. Experts who know why.

Targets: rats

Designed for: indoor and outdoor locations

Why T-Rex:

- **49% more clamping power¹:** Interlocking teeth offer secure containment for no escaped pests that leave your site vulnerable
- **Industry-leading strike force:** designed with unparalleled force to effectively control rats
- **Designed to kill quickly and effectively:** T-Rex is the most reliable mechanical trap for achieving a quick effective kill²
- **Maximum efficiency, minimum disruption:** Provides years of reliable protection in any environment with a 5+ year battery life and IP67 rating against dust and water

¹Based on third-party mechanical testing of average static clamping force on six snap traps.

²Based on third party mechanical testing of six snap traps

How are PestConnect devices connected?

Our pest control units operate on a dedicated, industry-standard network called LoRaWAN®. LoRaWAN® connects all your devices to a central Gateway, which sends data seamlessly to our system.

Crucially, the Gateway has its own pre-installed SIM, meaning it works entirely independently of your company's Wi-Fi or IT infrastructure. This ensures your data remains secure without requiring any complex setup or resources. A single Gateway can connect up to 1,000 devices, offering robust coverage with minimal hardware on your site.

Rodent control. Revolutionised.

Targets: rats

Designed for: indoor and outdoor locations

Why Eliminair:

- **Fastest air-driven multi-catch rodent control system** available, ensuring effective and humane control
- **24/7 real-time, intelligent PestConnect monitoring** for continuous protection
- **Automatic reset within 15 seconds**, ensuring the system never misses the next rat
- **Lightning-fast trigger time** for the highest standard of humane dispatch
- **100% rodenticide free** with no toxic or harmful chemicals
- Certified to the **NoCheRo standard for humane, high-efficacy non-chemical** rodent control¹
- **Proven 57% higher rodent attraction** versus the closest alternative²
- **HACCP compliant** with secure containment to meet the strictest hygiene standards³
- Rigorously tested and engineered for **IK10 proven durability**⁴

How can air power support your ESG goals?

Eliminair delivers a more sustainable alternative to traditional pest control interventions. The system operates entirely without rodenticides, pressurised CO₂, or toxic chemicals. Furthermore, it has been engineered to protect non-target species by securely containing catches and preventing biological contamination and secondary poisoning. Finally, to ensure a truly circular lifecycle, the entire product is 100% recyclable and can be completely diverted from landfills.

¹Independently proven to achieve a 100% dispatch rate within 15 seconds, exceeding NoCheRo and Swedish EPA Category A humane standards.

²Based on controlled lab testing of trap entry rates against 4 competitive multi-trap units

³Certified by HACCP International

⁴IK10 impact testing passed

AI-powered cameras for next-generation pest control

The latest leap in connected pest control is always on watch, so you don't have to be. AI-powered cameras offer unprecedented speed and efficiency while reducing the impact at your site.

This is because the technology allows experts to have visibility into pest activity at a customer site at a level they've never had before. AI then detects pests and can trigger an automated alert, enabling quick intervention. Businesses can ultimately benefit from quicker, more effective resolutions to pest activity, minimising the impact of infestations.

Let's look at how this next-generation technology can help you tackle pests in an unprecedented way.

PestConnect Optix
24/7 visibility of rodent activity with pest-control cameras

Targets: rats and mice

Designed for: hard-to-reach indoor locations such as wall and ceiling voids

Why PestConnect Optix:

- **Groundbreaking AI technology** accurately detects rodents and filters out false positives, saving you time and money in wasted visits
- **Automated privacy blurring** blurs humans to protect privacy for a GDPR-compliant solution
- **Small and discreet cameras** for hard-to-reach or high-risk areas for more protection with less disruption
- **Part of the Rentokil digital ecosystem:** provides quicker communication and intervention for better transparency of what's happening at your site
- **Integrated with myRentokil**, so you can see evidence of pest activity from on-site cameras for better transparency of what's happening at your site
- **Supports faster, more effective resolution** of pests, ensuring infestations are dealt with before they can escalate
- **HACCP certified**¹ for adherence to a globally recognised food safety management system, providing peace of mind with a quality, safe solution you can trust

¹ Certified by HACCP International

Rodent 93%

How are the pest-control cameras connected?

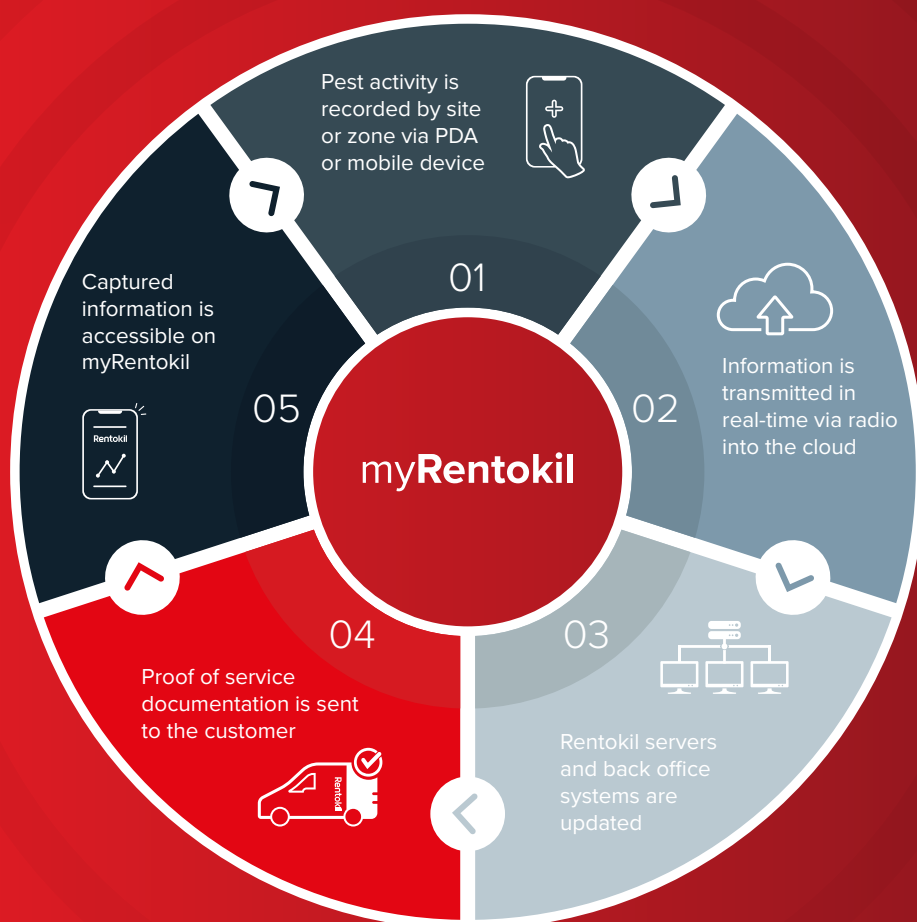

Our environmental monitoring cameras connect to Wi-Fi via a secure, dedicated router and will not connect to any other Wi-Fi at your site.

What is myRentokil and how does it work?

PestConnect is integrated with myRentokil: your reporting and analysis portal. myRentokil allows customers to be in control of their onsite pest management 24/7.

With myRentokil, you can:

- Demonstrate pest control performance improvements and responsiveness with detailed trend analysis and reporting capability.
- View detailed multisite floor plans and visit records with a single portal.
- Get immediate access to the latest versions of supporting documentation such as safety datasheets.
- Track and create an audit trail of the recommendations you've carried out to support audit compliance.
- Access all your online pest reporting 24/7 on desktop or mobile.

Concerned about data security?

myRentokil and PestConnect are ISO27001:2022 certified, the leading international information security standard.

What are other businesses saying about PestConnect?

“

I would recommend the PestConnect system to other companies. The advantages of this system are many, starting with the real-time, 24/7 monitoring of devices carried out by Rentokil, with less consumption of bait.

I would also recommend this system because it is very well suited to the increasingly demanding requirements of large distribution groups in Europe and beyond.

*Federico Calò, quality control,
Tenute Piccini*

”

“

Jinro Brewing is very happy to be working with Rentokil to take proactive steps to minimise the risk of infestations. With your digital pest solutions, we've got a very fast response and there is more transparency compared to traditional pest control.

*Seongjae Min, Quality and
Processing Manager at
Jinro Brewing*

”

“

One of the biggest advantages of myRentokil is that it is updated every day, so we can always be sure that the information is up to date. When issues are reported, the information is available on the screen and enables us to carry out trend analysis to see whether the issue is new, whether it's happened before, and which corrective solutions have been applied in the past.

Rentokil

The Experts in Pest Control

Why Rentokil

Rentokil is the global leader in pest control, offering expert, reliable and professional services to commercial and residential customers in over 90 countries worldwide.

We understand that protecting your employees' and customers' health protects your reputation. As the experts in pest control, we work with you to do the following.

Safeguard your reputation

We take a dual approach, incorporating preventative and responsive strategies to enhance protection for your business with a consistent, continuous pest-control programme.

Provide global insights with local expertise

With thousands of qualified technicians worldwide, we've extensive experience across various industry sectors. Our experts work proactively with you to minimise the threat of pest infestations in your local business.

Keep you one step ahead of pests

Our holistic, digital solutions use connected technology to help you predict and report all pest issues across your operations. We use unrivalled insight, data and reporting to help you proactively manage and prevent infestations, allowing you to concentrate on your business with the confidence you have pests firmly under control.
