

Coronavirus

Specialist Disinfection Services

With the largest regional teams in the UK, we are able to deliver a fast response and a professional and legally compliant service. Our business is still providing essential services in the fight against Coronavirus and as such, we are able to provide essential pest control and disinfection work for commercial, residential and local authority customers across the country.

Our qualified technicians are equipped with the necessary personal protective equipment, respiratory protective equipment and specialist disinfection equipment to work safely and effectively. We can provide the following services to help your business deal with the effects of the Coronavirus outbreak.

1 Specialist Disinfection to Assist with Coronavirus Containment and Control

- ✓ Carried out within **72** hours of a confirmed or suspected case of **Coronavirus** being reported on site.
- ✓ Technicians follow carefully assessed safety measures: their safety and the safety of the general public is of paramount importance to us.
- ✓ Disinfection using Steri-7, a high-level disinfectant that kills up to **99.9999%** of a broad range of pathogens within seconds of contact and has been tested against feline Coronavirus; a surrogate for Coronavirus. The service utilises specially formulated micro emulsion technology that applies an active barrier which can persist and kill for hours afterward. Our supplier's laboratory testing showed the barrier killing microbes (*including pathogens*) **72** hours after application. So long as the barrier is not wiped away, our treatment provides residual protection and biosecurity reassurance between cleans.*
- ✓ Waste removal following the '**COVID-19: infection and prevention control**' guidance set out by Public Health England.

*Source: Steri-7

2 Specialist Disinfection When a Coronavirus Case is Older Than 72 Hours

- ✓ Service reflects government guidance stating that under most circumstances, the amount of infectious virus on any contaminated surface is likely to have significantly decreased after **72 hours**.
- ✓ Disinfection of key touchpoints and ULV disinfection fogging, with legally compliant waste removal.

3 All-Purpose Specialist Disinfection

- ✓ Carried out when there are no confirmed or suspected cases of Coronavirus on site.
- ✓ Fast response, specialist disinfection to help you maintain a high level of hygiene in your premises.
- ✓ ULV disinfection fogging and legally compliant waste removal, with the option of additional touchpoint cleaning.

4 Contingency Survey

- ✓ Where speed of service is essential, a contingency survey allows us to gather key information to be able to react quickly in the event a Coronavirus case is reported.
- ✓ Survey is completed when there are no confirmed or suspected cases of Coronavirus on site.

Rentokil
The Experts in Pest Control

What is ULV disinfection fogging?

- ✓ Extremely small droplets of a disinfectant settle on inaccessible areas to enable the treatment of large areas in a short space of time.

What is touchpoint cleaning?

- ✓ Cleaning and disinfection of common touchpoints, such as door handles, to minimise the risk of microbial transfer.
