

## RapidPro Riddance

Fast & effective mouse control from 'The Experts!'

Finding mice in your home or business can be very distressing. Mice are known to spread disease as they search for food and shelter. This poses great health risks particularly in kitchens and other food preparation areas

The natural and constant gnawing habit of mice means they can also cause damage to your property, furnishings and equipment. Simple measures like proofing your property against rodents, such as mice is essential, but control treatments are required if they do gain access to your premises.

At Rentokil, we can offer effective and individually tailored treatment solutions to eliminate mice in your home or business, such as using an acute rodenticide, called RapidPro, which works kill mice after only one feed.

### Benefits of RapidPro Riddance

- **Quick & effective mouse control:** Fast acting, works after just one feed.
- **Safer alternative to other rodenticides:** Reduced risk of non target species poisoning and accidental poisoning, when used within tamper resistant bait stations.
- **Humane:** More humane solution than anticoagulants, as affected mice quickly fall asleep and die.

### Rapid Control Solution

Rentokil follows an Integrated Pest Management (IPM) approach to mouse control, using effective products and targeted solutions to quickly control mouse activity. One of our most effective treatment methods is our RapidPro Riddance service.

Our RapidPro Riddance service involves the placement of bait stations containing RapidPro (Alphachlorolose) which is an 'Acute' rodenticide, killing mice after a single feed.

The rodenticide works after just one feed and acts on the central nervous system, which puts the mouse to sleep, with death occurring soon after.
