

Product Datasheet

PestConnect T-Rex

Hardware that hits hard. Experts who know why.

Overview

T-Rex is a powerful, digitally connected snap trap equipped with interlocking teeth that offers industry-leading strike force.¹ It's specially designed to effectively capture rats and instantly notify our technicians of activity, so they can intervene before the problem escalates. This helps minimise the risk of an infestation, and together with the rest of our industry-leading connected range, provides you with the complete protection system you need for total peace of mind.

Key features

- 5-year battery life
- Superior rat trap with industry-leading strike force and 49% more clamping power¹
- Patented interlocking teeth make rat escapes virtually impossible
- Robust, water resistant and dust proof
- Connectivity: connects via LoRaWAN

Benefits

- Better protection against rats: Interlocking teeth offer secure containment for no escaped pests that leave your site vulnerable
- Industry-leading strike force: designed with unparalleled force to effectively control rats
- High-performance engineering: T-Rex is the most reliable mechanical trap for achieving a quick effective kill²
- Maximum efficiency, minimum disruption: IP67 rated against dust and water for years of reliable protection in any environment
- Supported by a 5 year battery life

Product: T-Rex Snap Trap

Dimensions

Height	73mm
Width	75mm
Length	142mm

Weight

146g

Materials

Glass Filled Polypropylene

Product operating temperature

0°C to 55°C

Degree of ingress protection

IP 67

Power supply

CR123A 3V

Connectivity

Local Area Network (LAN)
868-928 MHz depending on local approval
