Rentokil

Setting a new standard for pest control

PestConnect
Setting a new standard for pest control
How it works

PestConnect solutions actively detect, capture or kill a variety of pests, with innovative, humane and highly effective traps, bait stations & monitors.

These units feature integrated sensor technology that keeps watch over your premises all day, every day. If a pest is detected or the trap activated, it will trigger an immediate alert to Rentokil.

Using wireless technology, the system works completely independently and discretely. This avoids any interruption to your business network or machinery.
Real-time on-line reporting, with integrated PestConnect extranets.

Continuous monitoring of the customer site via Rentokil’s innovative Connect solutions

Unique to Rentokil, these units make use of leading infrared technology to monitor your premises all day, every day

As soon as the unit is triggered, a message is sent to an onsite control panel

This in turn sends a message to the Rentokil server within 60 seconds

Information is updated on the customer portal, providing a full audit trail that includes details of the time and location of pest activity

An alert is sent to the customer and details are sent to a local Rentokil technician

During the visit, the technician will survey the premises to identify any sign of infestation and recommend preventive measures required to optimise the integrated pest management strategy

All service visit activity will be recorded on our customer portal - a unique, online reporting system

Accessible 24/7, it provides access to real-time information, allowing you to identify risks, recommendations and trends

Flexible features provide information such as trend analysis, interactive site plans and audit checklists

Once notified, your local Rentokil technician will be in contact to arrange a visit at a suitable time for you
Together with the monitoring and real-time reporting power of PestConnect, our team can provide constant improvements and comprehensive recommendations to enhance your protection from pest contamination.

PestConnect, provides real-time information on all pest activity with trend reporting, interactive maps, charts and analytical tools.

- Continuous 24/7, 365 days per year protection & monitoring against pests
- Effective & immediate treatment to control & minimise business impact
- Fast response from skilled technician who will identify source of infestation & any further action
Technology-enabled solutions for your peace of mind

RADAR Connect

The range of PestConnect products, such as RADAR, can be used as part of an effective integrated pest management (IPM) solution for mice, to enable 24/7 remote monitoring and protection, ensuring you are always in control of any pest concerns. Using our effective, humane mouse trap RADAR, the Rentokil Connect technology allows immediate capture and containment, all whilst monitoring and reporting mice activity in real-time.

Benefits of Connect mouse control

- Continuous 24/7, 365 days per year protection against mice intrusion, minimising risk with instant alerts
- Effective & immediate treatment. Captures, humanely kills and hygienically contains mice, reducing any risk of contamination
- Real time reporting with easy-to-access data with immediate records of incidents via online, email or SMS notifications
- Highly reliable self monitoring system that provides advance warning of any issues such as low battery life - which could cause unexpected data loss
- Improved audit compliance with trends and analysis made available on myRentokil, providing additional assurance to third party auditors
- Complete records of data transmitted from site directly onto myRentokil, logging all activity and historical data
- Tailored risk thresholds providing the flexibility to adjust alerts according to prevailing risk and particular priorities bespoke to your business or site requirements
Individually tailored to your industry and your precise business needs, our solutions detect, capture or kill pests and alert a rapid response.

"myRentokil customer portal delivers real-time information, facilitating a proactive approach to pest prevention and control"

Features and benefits of myRentokil

- 24/7 information access across a range of smart devices, anytime anywhere
- Pest prevention recommendations - with priority status updates allowing you to focus on key concerns
- Intuitive user interface for ease of use
- Multi-site capabilities supported by site maps - allowing you to drill down to the level of detail required
- Trend analysis of pest activity - including reports to support legislative reporting and auditing requirements for potential risks to be anticipated and preventative measures to be taken
- Customised user reporting with the ability to schedule reports as required
- Document download facility for relevant documentation to be securely downloaded when required
Rentokil is the global expert in pest control.

As the market leader we have a deep understanding of the risks a potential pest problem can create. We understand that protecting the health of your employees and customers also protects your reputation.

Tailored solutions
Our team of experts will look to understand your business and facility to ensure your PestConnect solution is customised to your needs.

With over 90 years of experience, we are trusted by people and businesses that value the high levels of expertise, protection and reassurance our services provide.
Why Rentokil?
Rentokil is the global leader in pest control, bringing expert, reliable and professional service to commercial and residential customers in over 60 countries worldwide. As the experts in pest control, we work closely with you to:

Give you peace of mind
With over 12,000 qualified technicians worldwide, we have extensive experience across a wide range of industry sectors. Our experts work proactively in partnership with you to minimise the threat of pest infestations in your business.

Safeguard your reputation
We take a dual approach, incorporating both preventative and responsive strategies to enhance protection for your business through a consistent, continuous pest control programme.
