

PestConnect

Intelligent Pest Control That
Doesn't Cost the Earth

Complete Protection for Businesses

Rodent pests are a significant risk to businesses. They carry a wide range of diseases, can physically contaminate stock, damage building infrastructure and can cause significant economic damage to your business.

Both rats and mice are a big threat to businesses as they are adaptable, unpredictable and highly mobile, so having a robust pest control solution in place is vital to ensure you are protected against these damaging pests.

PestConnect, Rentokil's innovative connected pest management system, provides businesses with 24/7 remote monitoring and immediate control of rodent pests, using non toxic and highly targeted treatments.

Protection from the Experts in Pest Control

It is important that businesses have a pest control solution in place to help protect their staff and customers from the spread of disease and the damage caused by rodent pests

Our **connected devices** work in conjunction with visits from our expert technicians, to ensure we can react quickly to deal with any pest issues

During visits, our technicians will **raise pest control recommendations**, including proofing and housekeeping issues, to help you stay pest free

All visit details are recorded on **myRentokil**, providing a full auditable trail of site visits

Benefits of PestConnect for Businesses

PestConnect provides confidence and certainty to businesses. Key benefits include:

Connected 24/7 Monitoring and Control

Our **intelligent connect** offering effectively monitors and control rodents 24/7, saving you time and money dealing with costly infestations

Expert Technicians

With over **800 expert technicians**, Rentokil can provide a rapid response nationwide, through the local and consistent availability of staff

Unique and Effective Products

Tailored to your site and your needs, PestConnect provides a **real-time, early warning** system for the monitoring and control of rodents

Sustainable Solutions

We use a range of **sustainable solutions**, to effectively control rodents without harming the environment, saving up to 40% in rodenticide use and protecting your reputation

Compliant With Evolving Legislation

CRRU (Campaign for Responsible Rodenticide Use) guidelines are resulting in tighter legislation on the use of rodenticides

- PestConnect offers **100% non toxic** internal monitoring and control
- **Dual AutoGate Connect** reduces rodenticide exposure externally as well as the risk to non-target species and the environment
- PestConnect enables us to be **CRRU compliant**, whilst providing your business with the best defence against pests

“Over 51,000 PestConnect devices
customer sites in the UK”

Customer Referrals

CBRE

“The significant improvement in pest activity, combined with world class technology and a reduction in site disruption was a real hit with our client”

Angus Hanney
Global Sourcing Lead at CBRE

CHRIS HAYTER
TRANSPORT LTD

“PestConnect makes this part of my role so much easier. I am now able to hand our pest control report to the auditor, with full confidence that it is accurate and up to date.”
Marin Hamill, Site Manager

“PestConnect has introduced real time monitoring of our facility to support the prevention of any potential pest issues and we believe the system has taken us to the next level of protection.”
Andy Turner, Director

How PestConnect Works

- PestConnect uses a range of connected devices to monitor for, and control, any rodents that find their way into your business.
- Once a device is triggered, the system will send an alert to a Rentokil technician, who will then respond to deal with the activity quickly and effectively.
- Whilst on site the technician will check the surrounding areas for further signs of pest activity, along with raising relevant recommendations.
- Where deemed necessary the technician will implement additional controls using all relevant control methods available where appropriate.
- All details of the site visit, including pest activity and recommendations raised, will be reported on myRentokil.

RADAR X

Unique 24/7 monitoring, bait-free and effective catch and despatch mouse control system, with dual-catch capability.

*Use biocides safely. Always read the label and product information before use.

Dual AutoGate Connect

Allows for strategic external baiting to monitor and control target rodents **365** days of the year, whilst reducing the risk of non target species poisoning.

myRentokil Reporting

Provides insights into pest history and recommendation status, which gives the information needed to help us better protect your business.

myRentokil is accessible on PC, phone and tablet

T-Rex Connect

Specially designed to effectively capture rats and instantly notify our technicians of activity, so they can intervene before the problem escalates.

PestConnect uses Robust and Secure End to End System Protocols

Secure Dynamic Encryption

Ensures that PestConnect data is transmitted securely.

Robust UHF and Mobile Network

Strong signals between devices and control panels ensures that data is not lost. In addition, PestConnect transmits data using mobile networks, so at no point do we connect to the customer's WiFi.

Continual Back up on Secure Cloud Servers

Ensuring that data is secure and protected against unauthorised access or loss.

Even in the event of a temporary business closure, devices are still continually monitoring and controlling pests 24/7

A Sustainable Approach to Pest Control

All of our connected rodent control solutions are sustainable, effective and are compliant with UK legislation and regulations, giving you peace of mind that your business is protected against pests.

- PestConnect's sustainable products can help you achieve your **ISO 14001** environmental targets
- **RADAR X** has zero internal toxicity and zero bait, ensuring that no allergens are present internally
- **AutoGate** provides smart external rodent monitoring and control, whilst significantly reducing the risk of exposure of non-target wildlife to toxic rodenticides when compared to traditional baiting strategies.
- **Zero** paper reporting with myRentokil
