

## Vehicle Disinfection Service

With the largest regional and most responsive teams in the UK, we are able to deliver a fast response.

Our qualified technicians are equipped with the necessary personal protective equipment, respiratory protective equipment and specialist disinfection equipment to work safely and effectively.

Our vehicle disinfection service is professional and legally compliant and includes:

- Touchpoint cleans, internal and external.
- Fogging and/or spraying of the inside of the vehicle

We have 3 easy options to help your business.

### 1 Confirmed Coronavirus within 72 hours (on your premises)

- Internal Touchpoint Clean
- External Touchpoint Clean
- Fogging and/or Spraying of Internal Cab with Full Internal Wipe Down
- Fogging and/or Spraying of Rear Cab with Wipe Down (Vans Only)

### 2 All-Purpose Disinfection (on your premises)

- Internal Touchpoint Clean
- External Touchpoint Clean
- Fogging and/or Spraying of Internal Cab with Full Internal Wipe Down
- Fogging and/or Spraying of Rear Cab with Wipe Down (Vans Only)

### 3 Confirmed Coronavirus over 72 hours (on your premises)

- Internal Touchpoint Clean
- External Touchpoint Clean
- Fogging and/or Spraying of Internal Cab with Full Internal Wipe Down
- Fogging and/or Spraying of Rear Cab with Wipe Down (Vans Only)

## What industry types we can support?

- Commercial Fleets
- Emergency Vehicles
- Local Authority Vehicles
- Utility Services Vehicles
- Transport and Logistics Vehicles

## What PPE is worn by our team?

All appropriate PPE for specialised services are worn by our technicians, including gloves, boots, masks and coveralls.

## Steri-7 Xtra

Our disinfection service is carried out using Steri-7, a high-level disinfectant that kills up to 99.9999% of a broad range of pathogens within seconds of contact and has been tested against feline coronavirus; a surrogate of coronavirus.\*

Our service utilises specially formulated micro emulsion technology that applies an active Barrier which can persist and kill for hours afterward.

Our supplier's Laboratory testing showed the barrier killing microbes (including pathogens) 72 hours after application.

So long as the barrier is not wiped away, our treatment provides residual protection and biosecurity reassurance between cleans.\*
